Jenny Bradley stands beside the ancient drovers road of Thurkilsti and Rudland Rigg (now part of the Cleveland Way) - it is dwarfed by a tall boundary stone which marks the beginning of the Ingleby Estate. Jenny Bradley has a broken shaft set into a medieval stone base - sadly, the carved writings are now indecipherable. "The boundary stone has SIR W FOWELS cut into its north side with F 1838 on the south - in 1609 the estate was bought by Sir David Foulis, a Scot who came to England with James I. Sir William was the 8th baronet and after his death in 1845 his daughter took the estate in marriage to the Sidneys, Lords De L'Isle and Dudley." (An Illustrated Guide to the Crosses on the North Yorkshire Moors - Elizabeth Ogilvie & Audrey Sleightholme)

### The Three Lords Stone

<http://www.dalesman.co.uk/walks/cringle-moor-from-lord-stones-cafe>

Just behind the cafe lie the remains of the original Three Lords Stone, which once marked the spot where the vast estates of Lords Duncombe of Helmsley, Marwood of Busby Hall and Aylesbury of Snilesworth met centuries ago. It is also the site of some Bronze Age burial mounds, or tumuli, from where many flint arrowheads dating back over 5,000 years were discovered, which can now be seen on display in the cafe.
